To: Kaap Agri

Date: 20th August 2019

Attention: Jacomin van der Merwe

All our production runs and tested in our fully computerised laboratory to ensure they meet the SABS specification guide line, we following international testing methods with tests carried out daily and viewed by our international partners, adjustments are made where needed to ensure the quality and consistency of our foams.

Test results are available where needed and go back over 4 years, we welcome visits/audits to our Laboratory and foaming facility when and where required.

UF12/09 – Polyurethane foam

Foam: Polyurethane foam
Density: 9,50 to 13,50
Hardness: 07,50 to 11,50
Colour: Grey & White
Block size: 2750 x 1880 x 1100mm

The above polyurethane foam will be converted to Kaap Agri's require dimensions.

Please let us know if you require further information?

Regards,
